PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 5+ years of experience building and maintaining production systems across the **insurance, fintech, and graphic-industry software** sectors. Strong expertise in **JavaScript/TypeScript, Node.js (Express)**, and **React, Next.js, and Vue.js**, with solid backend depth in **Java (Spring Boot)** and **Python (Django)**. Proven track record designing microservices, REST and GraphQL APIs, payment integrations (Mercado Pago, Western Union, Pago Fácil), and cloud infrastructure on **AWS**. Strong ownership mindset across the full lifecycle: technical design, implementation, automated testing, deployment, and iteration. Experienced in agile (SCRUM) teams and CI/CD environments. English C1.

TECHNICAL SKILLS

Languages	JavaScript · TypeScript · Java · Python · PHP · SQL
Backend	Node.js · Express · Spring Boot (JDK 8, 11, 21) · Spring Framework · Django · PHP · Microservices · RESTful APIs
Frontend	React · Next.js · Vue.js · Nuxt.js · Three.js · Electron.js (desktop)
APIs & Auth	REST · GraphQL · JWT · OAuth2 · AWS Cognito · Session, role, and password-recovery management
Payments	Mercado Pago (Checkout Bricks) · Western Union · Pago Fácil · Transaction validation
AWS	Lambda · EC2 · S3 · RDS · Fargate · Amplify · API Gateway · Cognito
DevOps & CI/CD	Docker · Jenkins · Git · CI/CD pipelines · Production deployments
Databases	PostgreSQL · MySQL · MongoDB · Data modeling · Indexing · Query optimization · Caching
AI / ML	Meta SAM2 (image segmentation) · Integrating Machine Learning models into web applications
Architecture	Clean Code · Domain-Driven Design (DDD) · Clean Architecture · Automated testing · SCRUM

LANGUAGES

English	C1 — Advanced (fluent written and verbal communication in international settings)
Spanish	Native

PROFESSIONAL EXPERIENCE

NATIVODEV · Full Stack Engineer

May 2025 – Present · Remote

- Developed a **white-label broker portal** for an insurance company (Colón Seguros), enabling quote generation, policy issuance, and payment processing via Mercado Pago, with custom branding per broker.
- Involved in the full product lifecycle: software architecture, technical definition, implementation, automated testing, and production deployments.
- Built **microservices with Node.js (Express) and Java (Spring Boot)**, with frontends in React, Vue.js, Next.js, and Nuxt.js, following Clean Code and Domain-Driven Design principles.
- Implemented an end-to-end **Mercado Pago Checkout Bricks** integration, connecting the payment flow with automated policy issuance and backend business logic.
- Managed infrastructure on **AWS** (Lambda, EC2, RDS, S3, Fargate, Amplify, API Gateway), containerized applications with Docker, and maintained CI/CD pipelines in Jenkins.
- Integrated **GraphQL and REST** APIs and implemented secure authentication and authorization with **JWT and OAuth2**.
- Designed and optimized data models in **PostgreSQL and MySQL**, applying indexing, efficient queries, and caching strategies to improve performance.

Stack: *Node.js (Express) · Java (Spring Boot) · TypeScript · React · Vue.js · Next.js · Nuxt.js · AWS (Lambda · EC2 · RDS · S3 · Fargate · Amplify · API Gateway) · Docker · Jenkins · GraphQL · REST · JWT · OAuth2 · PostgreSQL · MySQL · Mercado Pago*

BIZLAND TECH · Full Stack Engineer Aug 2024 – Jun 2025 · Remote

- Developed and maintained **RESTful APIs in Java with Spring Boot** (JDK 8, 11, and 21) and in **Python with Django**.
- Designed the backend for **international transaction systems** integrating Western Union and Pago Fácil, covering business logic, transaction validation, and secure handling of sensitive data.
- Contributed to **Personal and Consumer Loan** projects, building React interfaces and Java/Spring Framework backend services following Clean Architecture principles.
- Managed **MySQL** connections and transactions, optimized queries, and deployed on **AWS** to ensure scalability and high availability.

Stack: *Java (Spring Boot · Spring Framework) · Python (Django) · React · MySQL · AWS · REST APIs · Western Union · Pago Fácil*

TAKTIFUL SOFTWARE SOLUTIONS · Full Stack Engineer Sep 2021 – Jul 2024 · Orlando, USA (Remote)

- **Kreator** — AI-powered image editing tool built in Python, integrating and adapting the **Meta SAM2** model for real-time segmentation and editing.
- **Reaktor** — Interactive 3D visualizer for graphic print previsualization, integrating Machine Learning models with **Three.js**.
- **Taktify** — Cost estimation platform for the digital embellishment industry, featuring real-time collaboration APIs and data analysis capabilities.
- Developed a **real-time chat module** within Taktify, enabling live collaboration between users working on shared cost estimation projects.
- Built a **Windows desktop application with Electron.js**, featuring user authentication and membership-based feature gating per subscription plan.
- Implemented a **full stack authentication system with AWS Cognito**, React, and PHP, handling sessions, roles, and password recovery flows.
- Built robust web applications with **PHP, React, and MySQL**, using AWS S3 for secure file storage in remote-first environments.

Stack: *React · PHP · Python · Three.js · Electron.js · MySQL · AWS (Cognito · S3) · Meta SAM2*
