<https://www.linkedin.com/in/santiocampo>

Fullstack Developer with 3 years of experience across individual and collaborative projects, working within agile (SCRUM) teams and CI/CD delivery environments. My core stack includes JavaScript/TypeScript, React, Node.js, Java & Spring Boot, PHP, relational and non-relational databases (PostgreSQL, MySQL, MongoDB), and Cloud Computing (AWS). Advanced English proficiency (C1) — comfortable communicating in international settings, both written and verbal. Spanish is my native language.

PROFESSIONAL EXPERIENCE:

- **Fullstack Engineer– NativoDev**

Buenos Aires, Argentina (Remotely) | May. 2025 – Present.

- Developed a white-label broker portal for an insurance company, enabling quote generation, policy issuance, and payment processing via Mercado Pago — with custom branding per broker. Contributed to architecture decisions, implementation, and production deployments.
- Built microservices using Node.js (Express) and Java (Spring Boot), with frontends in React, Vue.js, and Nuxt.js, following Clean Code and DDD principles.
- Managed infrastructure on AWS (Lambda, EC2, RDS, S3, Fargate, Amplify, API Gateway), containerized applications with Docker, and maintained CI/CD pipelines using Jenkins.
- Integrated payment processing with Mercado Pago (Checkout Bricks), REST and GraphQL APIs, and secure authentication with JWT and OAuth2.
- Designed and optimized MySQL data models, including indexing, efficient queries, and caching strategies.

- **Fullstack Engineer– Bizland Tech**

Buenos Aires, Argentina (Remotely) | Aug. 2024 – Jun 2025

- Developed and maintained RESTful APIs using Java and Spring Boot, ensuring compatibility across multiple JDK versions (8, 11, and 21).
- Integrated international payment systems (Western Union and Pago Fácil), covering business logic, transaction validation, and secure handling of sensitive data.

- Contributed to Personal and Consumer Loan projects, building React interfaces and Java/Spring Framework backend services following Clean Architecture principles.
 - Managed MySQL databases and query optimization, with deployments on AWS.
- **Fullstack Engineer– Taktiful Software Solutions**
Orlando, USA (Remotely) | Aug. 2023 – Jul. 2024
 - Developed web applications using PHP, React, and MySQL, with authentication via AWS Cognito and file storage on AWS S3.
 - Kreator — AI-powered image editing tool using Python and integrating the Meta SAM2 model for real-time segmentation and editing.
 - Reaktor — Interactive 3D visualizer for graphic print previsualization, integrating Machine Learning models with Three.js.
 - Taktify — Cost estimation platform for the digital embellishment industry, featuring real-time collaboration APIs and data analysis capabilities.
 - **Trainee Backend Engineer– Mindcube SAC**
Lima, Perú (Remoto) | Jun. 2023 – Aug. 2023
 - Implemented backend features including authentication, email automation, and file upload functionality.
 - Managed time-sensitive updates such as content changes and database upgrades.
 - Collaborated within an agile team, maintaining direct communication with stakeholders.

RECENT PERSONAL PROJECTS:

- **Kaizen** — Desktop habit tracker built with Tauri 2 + React, with bilingual EN/ES support.
- **Personal Portfolio** — Personal portfolio featuring an AI assistant powered by Claude via Supabase Edge Functions. Link: <https://santiocampo.com>
- **Agrosury** — Bilingual business website for an animal protein trading company, built with React, Tailwind, and Framer Motion. Link: <https://agrosury.com>

EDUCATION

- **Full Stack Web Developer** – Henry Bootcamp | 2023
- **Higher Technician in Software Development** – IES | 2021 – 2023
