Fullstack Developer with 3 years of experience across individual and collaborative projects, working within agile (SCRUM) teams and CI/CD delivery environments. My core stack includes JavaScript/TypeScript, React, Node.js, Java & Spring Boot, PHP, relational and non-relational databases (PostgreSQL, MySQL, MongoDB), and Cloud Computing (AWS). Advanced English proficiency (C1) — comfortable communicating in international settings, both written and verbal. Spanish is my native language.

PROFESSIONAL EXPERIENCE:

- **Fullstack Engineer– NativoDev**

Buenos Aires, Argentina (Remotely) | May. 2025 – Present.

- Developed a white-label broker portal for an insurance company, enabling quote generation, policy issuance, and payment processing via Mercado Pago — with custom branding per broker. Contributed to architecture decisions, implementation, and production deployments.
- Built microservices using Node.js (Express) and Java (Spring Boot), with frontends in React, Vue.js, and Nuxt.js, following Clean Code and DDD principles.
- Managed infrastructure on AWS (Lambda, EC2, RDS, S3, Fargate, Amplify, API Gateway), containerized applications with Docker, and maintained CI/CD pipelines using Jenkins.
- Implemented end-to-end Mercado Pago Checkout Bricks integration in the broker portal, connecting the payment flow with automated insurance policy issuance and backend business logic.
- Designed and optimized MySQL data models, including indexing, efficient queries, and caching strategies.

- **Fullstack Engineer– Bizland Tech**

Buenos Aires, Argentina (Remotely) | Aug. 2024 – Jun 2025

- Developed and maintained RESTful APIs using Java and Spring Boot, ensuring compatibility across multiple JDK versions (8, 11, and 21).

- Integrated international payment systems (Western Union and Pago Fácil), covering business logic, transaction validation, and secure handling of sensitive data.
 - Contributed to Personal and Consumer Loan projects, building React interfaces and Java/Spring Framework backend services following Clean Architecture principles.
 - Managed MySQL databases and query optimization, with deployments on AWS.
- **Fullstack Engineer– Taktiful Software Solutions**
Orlando, USA (Remotely) | Aug. 2023 – Jul. 2024
 - Kreator — AI-powered image editing tool using Python and integrating the Meta SAM2 model for real-time segmentation and editing.
 - Reaktor — Interactive 3D visualizer for graphic print previsualization, integrating Machine Learning models with Three.js.
 - Taktify — Cost estimation platform for the digital embellishment industry, featuring real-time collaboration APIs and data analysis capabilities.
 - Built a Windows desktop application using Electron.js with user authentication and membership-based feature gating, controlling access to platform services per subscription plan.
 - Implemented a full stack authentication system integrating AWS Cognito with React and PHP, handling sessions, roles, and password recovery flows.
 - Developed a real-time chat module within Taktify, enabling live collaboration between users working on shared cost estimation projects.
 - **Trainee Backend Engineer– Mindqube SAC**
Lima, Perú (Remoto) | Jun. 2023 – Aug. 2023
 - Built a PDF processing and document management system for a legal consulting firm, automating file upload, indexing, and distribution workflows.
 - Implemented backend features including authentication, email automation, and file upload functionality.
 - Managed time-sensitive updates such as content changes and database upgrades.
 - Collaborated within an agile team, maintaining direct communication with stakeholders.

RECENT PERSONAL PROJECTS:

- **Hi Fry Burgers (Freelance)** — E-commerce web app for a burger restaurant, built with React, Vite, and Supabase. Link: <https://hifry.app>
- **Personal Portfolio (Personal)** — Personal portfolio featuring an AI assistant powered by Claude via Supabase Edge Functions. Link: <https://santiocampo.com>
- **Agrosury (Freelance)** — Bilingual business website for an animal protein trading company, built with React, Tailwind, and Framer Motion. Link: <https://agrosury.com>

- **Kaizen (Personal)** — Desktop habit tracker built with Tauri 2 + React, with bilingual EN/ES support. Link (code): <https://github.com/santiocampo1/kaizen>

EDUCATION

- **Full Stack Web Developer** – Henry Bootcamp | 2023
- **Higher Technician in Software Development** – IES | 2021 – 2023
